EDUCATION

September 2021- July 2023

Computer Programming Pr. , Marmara University, Istanbul (**GPA:** 3.088)

September 2016- June 2020

High School, Dede Korkut Anatolian Highschool, Istanbul

SELF-INTRODUCTION

I am a software developer with a strong inclination for teamwork, problem-solving, and communication skills. Integrity and transparency are my priorities in my work. When collaborating on projects, I focus on taking responsibility and continuous learning. With the experience I've gained in software development and project management, I demonstrate a strong stance in both technical aspects and interpersonal relations.

EXPERIENCE

Intern Developer

Jul 2022-Sep 2022

Internship in ASP.NET Core at a small software company

- Contributed to the development of web-based applications
 - Backend development using C#
 - Database management and API integrations
-

ACTIVITIES AND PROJECTS

Cyber Security Club Member (MCSOC) 2021-2022

Dormitory Registration Automation (C#): Developed a comprehensive student registration and management system for dormitory administration. This project involved designing a user-friendly interface for administrative staff, implementing features for student enrollment, room allocation, and tracking, and ensuring data security and integrity throughout the application.

Platform Game (Unity 2D): Designed and developed an extensive 2D platform game using Unity. This project included creating intricate game levels, designing characters and assets, implementing game mechanics and physics, and optimizing performance. The game also featured various challenges, collectibles, and interactive elements to enhance player engagement.

E-commerce Website (Python/Django): Created a fully functional e-commerce platform using Python and Django. This project involved designing the website's layout and user interface, integrating essential features such as product catalog, shopping cart, and payment gateway. Additionally, implemented user management functions, including account creation, authentication, and order tracking, to provide a seamless shopping experience

Volunteer Activities: I volunteered to convert books from my school's library into audiobooks to support visually impaired individuals. (2022-2023)

SKILLS AND INTERESTS

- Language

Demonstrates advanced proficiency in reading and understanding complex English texts, including technical documentation, literature, and professional materials. Capable of interpreting nuanced information and conveying it accurately in both written and verbal forms

- Technical

HTML, CSS, JavaScript, React , Python/Django, C#, Android Studio, MSSQL,Java
